AIDS, TB AND MALARIA  
IN **MALI**

## IMPLEMENTATION OF GLOBAL FUND GRANTS IN A CHALLENGING OPERATING ENVIRONMENT (COE) AND COORDINATION OF PARTNERS FOR TECHNICAL ASSISTANCE

### Under the implementation of the GF programme in a challenging operating environment, good practices include:

- Involving community leaders in the implementation of activities in the community;
- Collaboration with local authorities to better involve them in implementation;
- Involving local organisations in hard-to-reach areas;
- Use of mobile payments for all activities;
- Partnership with humanitarian organisations to better monitor implementation in hard-to-reach areas;
- Mali has aligned the seasonal malaria chemoprevention (CPS) implementation period with campaigns carried out in neighbouring countries (Burkina Faso, Guinea, Senegal)
- The distribution of second generation mosquito nets took into account the realities of geographical resistance, particularly in the border regions of Burkina Faso.

### Mali's experience in terms of technical assistance for Global Fund grants which is generally funded by the RBM Partnership to End Malaria, Expertise France/ Initiative, WHO can be summarised as follows:

- Technical support in the development of concept notes (budget, performance framework, narrative)
- Support for the implementation of specific activities

## RECOMMENDATIONS ON THE WAY FORWARD:

- Planning should take regional experiences into account;
- Technical assistance provided by partners should be under the coordination of the national programme and respond to the actual needs of the country in relation to the disease;
- Partners should exchange with all active and local partners in the field to better understand the context
- Integrate aspects of good governance in all health system financing.
